## SICILY - ITS ART, CASTLES AND VINEYARDS

### A Wine Tasting Tour in the Ragusa Region

Ragusa Ibla, Sicily

The Tour visits the South East corner of Sicily, a beautiful, unspoilt region. Backed by the Iblei Mountains which descend gently south to the sea, they are ideal for wine production and the region has some of the best vineyards in Sicily. With viniculture going back to Greek and Roman Times, our visits to some vineyards combine excellent wines with some outstanding historical sites.

Our hotel Relais Parco Cavalonga is an elegant 4 star (commented in one review as a 4 star hotel with all the attributes of 5 stars) set in its own park of 18 hectares and is central to this beautiful and historic region of Sicily.

Our hostess is Laura D' Andrea an artist belonging to one of the ancient Sicilian families, who with her local knowledge has organised for us to meet the owners of vineyards which are part of their estates. In this way we will appreciate the character of the area on a social as well as on a touristic aspect.

It is no accident that the Italian State Television chose the region for their series on Montalbano and we include one of his favourite Restaurants and a view of his house in the Tour.

They were beautifully restored over ten years and uncovered only two years ago.
